

iTABLE™

The i-Table combines a variety of our products to create a new table game experience. Utilizing six touch-screens embedded in a standard size blackjack table, the i-Table combines an intuitive electronic betting interface with a live dealer who deals the selected game from the appropriate card reading device. By automating the betting process, it increases game security, accuracy and speed, resulting in an estimated 30% increase in rounds per hour while eliminating errors. Additionally, the i-Table:

PROVIDES OPERATING AND LABOR SAVINGS

- Less pit supervision and dealer training required
- Fewer fills

ENHANCES GAME SECURITY

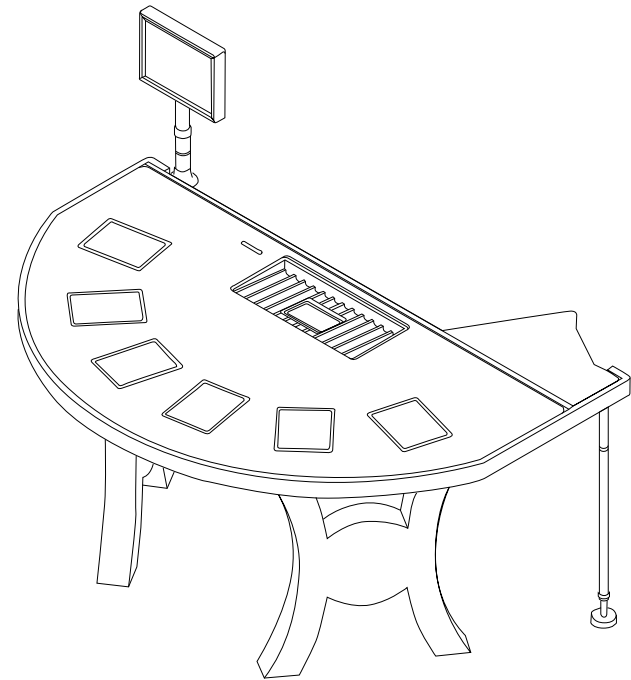

- Eliminates dealer errors in game transactions
- Reduces chip theft
- Eliminates capping / pinching bets
- Eliminates card manipulation cheating

INCREASES HANDS PER HOUR AND WIN

- Instantly resolves wagers at the end of each round
- Includes multiple side bets with a variety of house advantages
- Enables proposition wagers on games like blackjack

TABLE™ **Blackjack**

The i-Table for blackjack and baccarat utilizes either an i-Shoe Auto card reading shoe or a one2six Plus continuous shuffler to identify the cards that are being dealt, and interfaces with the table's software to instantly and accurately resolve all game play once each round is completed. The interactive system provides operators with an unprecedented level of information regarding game play and player decisions while minimizing player disputes and delays. Finally, the i-Table also provides you with the ability to offer your players access to popular side bets and other features like blackjack odds.

AVAILABLE SIDE BETS

- Royal Match 21 Blackjack
- Bet the Set "21" Blackjack

TABLE™ Specialty Games

The i-Table specialty table game version's versatile software and hardware design makes it easy for you to update your pit configuration as player demand requires. Following a few simple steps, you can turn a Three Card Poker table into an Ultimate Texas Hold'em table, or change table limits, paytables and more.

The i-Table for specialty games utilizes an i-Deal single deck specialty shuffler to identify the cards that are being dealt, and interfaces with the table's software to instantly and accurately resolve all game play once each round is completed.

GAMES AVAILABLE NOW

- Three Card Poker
- Ultimate Texas Hold'em

GAMES COMING SOON

- Blackjack Switch
- Let It Ride Bonus with 3 Card Bonus
- Four Card Poker

i-table ROULETTE™

i-Table Roulette is a product that has taken the evolutionary step from player terminal units to a seam-less and intuitive table game product where all the components are merged into a product that mirrors a traditional Roulette table game.

This design eliminates the footprint concerns associated with electronic player terminals while still offering the same multitude of key benefits .

We have introduced dealer chips and dealer betting to allow the patrons and dealer to play together. i-Table Roulette truly offers your players a unique individualized gaming experience.

KEY FEATURES

- Live game outcomes
- Measurable patron game play (i-Table Roulette offers an array of reports)
- Configurable minimums and maximums
- Selectable on-screen chip sets
- Electronic pays and takes

BENEFITS

- Eliminates pay and take errors
- Increased security
- Increased spins per hour
- Bet multiples per game increase

FAQs

HOW DOES THE I-TABLE IMPROVE GAME SECURITY?

The i-Table's electronic betting interface and automated card recognition technology improves game speed and security while reducing many of the operating expenses associated with live tables. This innovative approach enables you to generate more revenue with fewer errors, higher security and less supervision.

Its minimal chip handling combined with automated bet resolution results in no dealer errors in game transactions while reducing chip theft. Additionally, the table's electronic betting interface eliminates capping or pinching bets, and the system's card recognition technology and game logic combine to eliminate card manipulation cheating while preventing dealer/player collusion.

DOES THE I-TABLE HELP REDUCE OPERATING EXPENDITURES?

Yes, by automating many of the game's manual processes and resolving all pays and takes electronically, it requires less pit supervision and less dealer training. Additionally, because game play is conducted with electronic chips, fewer fills are needed, and RFID chips and sensors are unnecessary.

CAN THE I-TABLE HELP IMPROVE MY TABLES' ROUNDS PER HOUR?

The i-Table increases game speed and table productivity by automatically resolving all wagers at the end of each round. This can result in an up to 30% increase in hands per hour.

HOW DOES THE I-TABLE HELP GENERATE INCREMENTAL REVENUE?

When combined with its variety of additional wagers including multiple side bets and real-time proposition wagers, the i-Table can also help generate additional revenue.
